Full list of author information is available at the end of the article

1 Introduction

The bibliography (report.bib) must respect BibTeX format. You can cite entries in your bibliography using their tags:

- Cite an article: [1]
- Cite a GitHub repository: [2]

You can use inline code highlight. This paragraph shows how to add blank lines and how to start a paragraph without indentation.

2 Section

You can create additional sections as you prefer. Section title levels are determined by the number of hastags as in a traditional markdown file.

2.1 Subsection

Subsection content goes here. You can create numerated lists:

- 1 The labels consists of sequential numbers.
- $2\,$ $\,$ The numbers starts at 1 with every call to the enumerate environment.

2.1.1 SubSubsection

You can add mathematical formulas. Single dollars (\$) are required for inline mathematics e.g. $f(x) = e^{\pi/x}$.

You can also use plain LATEX for equations:

$$\hat{f}(\omega) = \int_{-\infty}^{\infty} f(x)e^{i\omega x}dx \tag{1}$$

and refer to Equation 1 from text.

Figure 1 Your caption goes here.

3 Results

Figure files must be placed at the **figures** folder. You can include figures using the following block:

To refer a figure in the text, you need to use the respective label defined in its caption: Fig. 1

Availability of Supporting Data

More information about this project can be found at: http://github.com/repo_owner/repo_name.

Competing interests

Please add if there are competing interests. Otherwise, type None.

Author's contributions

 $\ensuremath{\mathsf{JD}}$ and $\ensuremath{\mathsf{JJD}}$ wrote the software, $\ensuremath{\mathsf{JD}}$ performed tests, and $\ensuremath{\mathsf{JD}}$ and $\ensuremath{\mathsf{JJD}}$ wrote the report.

Acknowledgements

The authors would like to thank the organizers and attendees of OHBM Brainhack 2020.
